Model No. 1280-II

DESIGN GEORG APPELTSHAUSER

An extensible, rectangular dining table made of natural stone wood that convinces by its modern strictness. Thanks to the extension mechanism the symmetry with the substructure is always maintained in the extended as well as the closed position. With a new technique the extension leaf can be rotated by another 90°. Thus it is now positioned lengthwise under the center leaf and is no longer visible from the side. This model is offered with 3 different bases.
